

Tying research to real life for Connecticut communities, citizens and businesses

UConn Extension

UConn Extension connects the power of UConn research to real life for Connecticut communities, citizens and businesses. Our programs create practical, science-based tools and technologies to help solve complex problems.

Extension provides outreach, knowledge and expertise to the public in areas such as: economic viability, business and industry, community development, agriculture and natural resources.

Agriculture & Food Systems
 Families & Community
 Land Use & Water
 Nutrition & Wellness
